Bloating: A Lesser Known Symptom Of Ovarian Cancer

By Ana-Marija Dolaskie — February 23, 2018

A surprisingly low number of women consider sudden, but persistent bloating as a serious condition — one with a serious underlying cause. The news comes from a recent study [1] which showed that women are more likely to make dietary changes if they experience bloating — rather than contact their physician. Persistent bloating is the lesser known symptom of ovarian cancer.
