Pokémon Go: Getting Kids [And Adults] Off The Couch

By Ana-Marija Dolaskie — July 12, 2016

Here's a Nintendo-owned augmented reality game that doesn't require sitting on the couch. In fact, you have to *walk* to play it, and it's taken the U.S. by storm. Pokémon Go encourages players to find and 'catch' Pokémons by taking a walk in the real world and getting some exercise to boot. Pretty genius, if you ask us.
